

AI Reporting Automation

Give strategists their month back.

Clarity Digital connects search, advertising, analytics, CRM, and call-tracking data into client-ready reporting, then uses governed AI workflows to surface insights and next steps.

60–80%

TYPICAL REDUCTION IN REPORTING HOURS

2 WEEKS

AVERAGE TIME TO FIRST AUTOMATED REPORT

100%

WHITE-LABEL, ON YOUR BRAND AND DOMAIN

CONNECTED INTELLIGENCE

One reporting layer. Every channel.

01 CONNECT

GA4, Search Console, ads, CRM, calls

02 RECONCILE

Canonical metrics and attribution rules

03 ANALYZE

Claude, ChatGPT, integrations and MCP

04 DELIVER

Dashboards, PDFs and executive summaries

CLIENT-READY OUTPUTS

Reports built for decisions

- Executive performance snapshot
- SEO traffic and conversion trends
- Keyword rankings and opportunities
- Google and Microsoft Ads efficiency
- Meta Ads creative and funnel health
- AI visibility across answer engines
- Multi-touch journey contribution

WHAT YOUR AGENCY GETS

A practical, governed system

- Automated data freshness checks and alerts
- AI-written analysis with strategist review
- Multi-touch attribution across disconnected systems
- Reusable templates for every service line
- Team training, documentation, and handover

BUSINESS IMPACT

Less assembly. More strategy.

Account teams stop rebuilding slides and start explaining what changed, why it matters, and where the client should invest next.

Ready to automate agency reporting?

Start with one client, one report, and one governed source of truth.
